Equipping Missionaries Worldwide

March/April 2025

CHRISTIAN AID MISSION

PROJECT #737 •Ministry Vehicle

Philippines

Christian Aid Mission supports indigenous missionaries who are sharing the gospel in some of the world's most difficult fields. One of their partners, [New Tribes Mission \(NTM\)](#), is a church-planting ministry working among unreached people groups. The NTM staff trains ethnic believers to serve as pastors and elders in their home churches. They also engage in community development through agricultural projects, literacy, and healthcare programs.

To prepare indigenous missionaries for the field, NTM operates a [School of Missions](#).

New ministry vehicle

Transporting students to and from school had become a difficult challenge, especially for those students living in remote locations.

MPF was asked to help by raising funds for a 12-passenger van. Soon after the project was completed last spring, the school began using the new vehicle for

ministry activities including outreach trips to distant locations, visiting tribal churches far from school, picking up donated food and supplies for students and staff, and various other activities.

In a message from NTM, they state: "Praise God we were able to purchase a brand-new vehicle... We thank God for the [Mission Projects Fellowship donors](#) for their generosity and their great love for God and His work!" 🙏

Building Up His Church, One Project at a Time!

OneWay Ministries

PROJECT #739 • Pick-up Truck

Ghana, West Africa

OneWay Africa Team

The ministry team of OneWay Africa (a part of OneWay Ministries) travel far and wide to bring the gospel to unreached people groups throughout the country of Ghana. From their headquarters in Accra, they cover **thousands of miles each year** over the rough African terrain. When visiting very remote areas, there are often no roads available and the team must drive through the bush using motorcycle paths. Various hazards include flooding, deep potholes, and rocky surfaces, all of which are tough on vehicles.

OneWay Africa Executive Director, Ray Mensah

Since project completion one year ago, the new, rugged ministry vehicle, which the team nick-named the "**Wheels of the Gospel**," has transported people, equipment, and the Scriptures throughout Ghana to advance the work of the Lord! ☺

"The moment the OneWay team arrives at their destination, the rough travel is always worth it. This new truck is proving very helpful for carrying everything they need to effectively reach the Ghanaian people for Jesus!" -OneWay Africa

Recipe: Christian Growth in 2025

Second Ingredient - **Obedience**

What is it? An act of surrender—choosing to trust God's will over our own

Where do we get it? Obedience should come, not from fear of punishment, but out of a deep reverence and love for Him.

How often should we apply it? Daily!

*This month, we continue our survey of five things to encourage growth in our personal walk with the Lord. Here is the **second ingredient** that can help us become more mature Christians. By the end of the year, you will have the full "recipe" and, hopefully, a closer walk with Him!*

Why we do what we do! Missionaries depend on reliable equipment to accomplish their global outreach goals. At MPF, we help **bridge the gap** for Christian mission organizations who lack adequate resources. We hope you'll consider supporting our ministry and the equipment projects we fund!

CURRENT PROJECTS

Funding for these projects is made possible through the prayers and financial gifts of faithful supporters like you!

755	EGYPT	The STREAMS OF LIVING WATER team in Egypt manages ministries in twenty different countries, operating out of separate workplace locations. Streams recently acquired an office building with room for all of their staff to work together, which will greatly improve efficiency and communication. They are in the process of renovating the building and need assistance to upgrade the fire alarm system to meet current building codes. Equipment includes Loop Wiring, 35 smoke detectors, and 20 break-glass fire alarms.	\$2,516	
756	NIGERIA	RISHAMA INTERNATIONAL runs the Faith and Hope Christian Academy in central Nigeria where many of their 420 students are orphaned and others come from critically impoverished families. Because electric supply in Nigeria is so unpredictable and the school's back-up generators use expensive diesel fuel, MPF is funding equipment for a solar power hookup so that this Christian academy can transition to reliable solar power before the next school year.	\$8,770	
757	DOMINICAN REPUBLIC	BOLD HOPE is building a Community Center that will house a church and school in a transitional community for struggling Haitian immigrants. Many immigrants who come to the DR to work in sugar cane plantations live in areas called "bateyes" where conditions are horrendous. MPF is raising funds to get equipment for a well site which will serve hundreds of residents who live in the new community. Equipment needed includes a well pump, generator, cistern, and cistern pump.	\$5,262	
759	WORLDWIDE	SHARE EDUCATION SERVICES supports overseas missionaries in the task of educating their children through conferences, tests, and other resources. After the pandemic, SHARE realized the positive effect virtual ministry can have. They wish to upgrade their equipment and purchase items which will allow them to stream in-person events, webinars, podcasts, and set up an online audio/visual resource library for missionaries. Equipment needs are bluetooth speakers, projector, camcorder, channel mixer, and more.	\$2,960	
761	SOUTH SUDAN	CEF MINISTRIES is focused on reaching boys and girls with the gospel of Jesus Christ. In South Sudan, there are thousands of children in refugee camps waiting to hear the gospel, but these camps are located over a wide region and the CEF staff needs motorbikes to reduce travel time and increase ministry time. Would you help MPF raise funds for two motorbikes to meet this transportation need? Each motorbike will cost around \$1,600.	\$3,200	
762	INDIA	SUNSHINE MINISTRIES meets the needs of children and families in and around the city of Hyderabad through the Good Shepherd School & Home where they offer education to needy children in K-10th grade. In 2024, they launched the Faith Bible College to train local pastors and equip them with essential resources. They are in need of five laptops — four of them will be used for the new Bible college and one is needed for the school administrator at Good Shepherd. The cost for each laptop is \$699.	\$3,495	
763	VIETNAM	HOPE'S PROMISE strengthens families through Christ-centered foster care, adoption, and orphan care. They have seven "Hope Homes" in Vietnam where Christian couples care for the needs of several children. MPF is raising funds to help make these homes safer and more comfortable. Will you join with us in supporting these families? Items needed are a refrigerator, hot water tank, air conditioner, gas stove, bicycle, wardrobe/closet, and a washing machine	\$2,350	
764	SOUTH ASIA	The staff at PAK7 make high-quality videos accessible to people in a South Asian country that has the second highest number of unreached people groups in the world. They operate a 24-hour satellite TV channel and currently have to rent expensive equipment. MPF is raising funds for them to purchase their own equipment and continue to reach the unreached with the gospel of Christ. Items needed are LED Dome Lights, Sony and Samyang Camera & Lens Kits, and a Libec 650 Tripod System.	\$6,132	

SPRING FUNDRAISER

765	BENIN	LIVE EAR MINISTRIES supports language, education, evangelization, and life empowerment for the deaf community in West Africa. Their Christian deaf school has over 50 students and 21 staff members. Because electric supply is very unreliable and expensive, they want to upgrade to solar-power to run lights, fans, computers, and more. This project will benefit not only the school and church, but the whole community! Items needed are solar panels, batteries, converters, cables, structure supports, etc.	\$9,830  SPRING FUNDRAISER
766	BARBADOS	INTERNATIONAL COOPERATING MINISTRIES (ICM) supports indigenous believers and churches by equipping them with two vital resources: a permanent church building and discipleship tools for oral learners. Their partner in Barbados needs help to train and equip local Christian leaders. MPF is raising funds for 300 Solar-powered Audio Players loaded with an audio Bible and ICM's Foundations Curriculum and 300 Kingdom Cross USB's with the same audio Bible and Foundation materials plus a copy of the Jesus Film.	\$11,002  Audio Player  Cross USB
767	SOUTH AFRICA	Pastor Dennis works alongside ABWE missionaries and runs a radio ministry called Sound Doctrine Hub through which the gospel is reaching into South Africa like never before. He needs video equipment to livestream his radio show and post it online along with local evangelistic outreaches and Sunday morning church services. This is an important step in accessing remote areas where radio transmission is absent. Equipment includes a Sony Lens Kit, Studio Sound Card, Tripod Stand, and more.	\$9,790 
768	INDIA	Nearly two years ago, THUNDERZOLL, INC. opened an Education-Feeding Center located 100 miles north of Peace Children's Home and is run by their ministry partner, Pastor Enosh. Local elementary-age school children come to the center to receive food and tutoring help. They currently serve about 70 children daily. Because electric supply in the village is unpredictable, sometimes off for days at a time, MPF is raising funds for a back-up generator so the center will have a reliable source of electricity for their ministry.	\$3,000 
769	SOUTH AFRICA	The ministry of Single Moms Raising Sons (SMRS) joined with CHRISTIAN WORLD OUTREACH four years ago. Since then, they have provided encouragement, Bible study, and teaching to numerous single moms while also caring for and guiding their fatherless sons through camps and mentoring. Many of the single moms who attend these Bible studies are impoverished, lack education, and have few resources to care for their families. Please join MPF as we raise funds for three laptops for their South African office staff.	\$750 
770	NORTHERN KENYA	SHEPHERD'S STAFF supports and equips churches to send out their own members as missionaries. Jay and Sumter Brantley's ministry, Nkishon (the Samburu word for "life"), works in Northern Kenya and have lived among the Samburu people for over six years. They've established a church and pastor's training college, and this summer their team is opening a pre-school for the local community. Since they are so remote, MPF was asked to help with a Solar Panel Project which will give reliable electric to these ministries.	\$4,262 
771	GUAM	On the island of Guam, TRANS WORLD RADIO has been beaming messages of hope in Christ into the continent of Asia for almost 50 years. The infrastructure of station KTWB is a growing challenge. In the past when issues arose, it took a team of 4 or 5 people up to three days to do an inspection & repair—they have ten towers, each 250 ft. high! With a drone, it takes only 15 minutes to check out the issue and see what tools they'll need. They currently have an older, recreational model drone. MPF is funding an industrial-sized drone which will get better images, longer flight times, and be able to withstand high winds. Items needed are a DJI Mavic 3 Pro Drone, Headset, and Certification test.	\$4,563
